To allow you to log into the WHEAP site, please set your security setting in Internet options to the following. This will make WHEAP a trusted site.

The the best way to address the pop ups in the WHEAP application is to configure Internet Explorer as listed below.

How to Configure the Pop-up Blocker in Internet Explorer

Windows XP Service Pack 2 (SP)

Allow Web sites list

You can allow pop-up windows to open in a Web site by adding the Web site to the Allowed

sites list. To do this, follow these steps:

1. Click Start, point to All Programs, and then click Internet Explorer.

2. On the Tools menu, point to Pop-up Blocker, and then click Pop-up Blocker Settings.

3. In the Address of Web site to allow box, type the address of the Web site, and then click

Add.

4. Click Close.
